

Area and Perimeter

Perimeter: The distance around the outside of a shape.

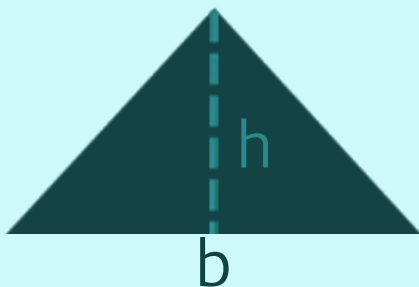

Area: The space within the shape.

Rectangle

$$A = b \times h$$

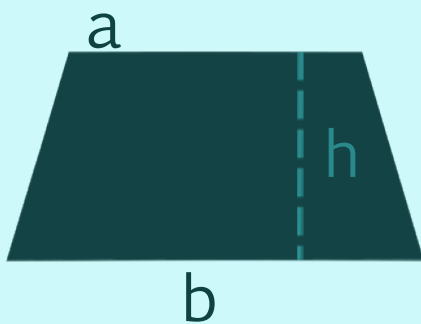

Area = base x height

Triangle

$$A = \frac{1}{2} (b \times h)$$

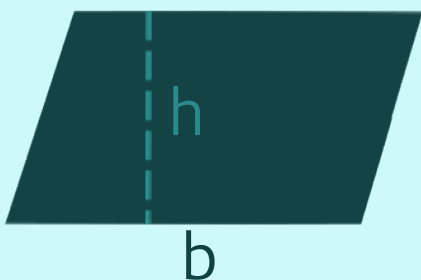

Area = half (base x height)

Trapezium

$$A = \left(\frac{1}{2}(a+b)\right) \times h$$

Area = (half (top + base)) x height

Parallelogram

$$A = b \times h$$

Area = base x height
